THE BEST SOLUTION IN THE MANUFACTURE OF CONCRETE  
BATCH PLANTS

# MODEL B15 MINIPLANT

**PRODUCTION RATE: 39.2 Yd<sup>3</sup>/h**

## GENERAL FEATURES

PRAGMACERO® B15 is a plant configuration that allows you to optimize on-site spaces for constructions, especially vertical ones, in high traffic urban areas. Its ease of use and maintenance allow it a lean operation and a production capacity of around 261.5 Yd<sup>3</sup> per day, depending on the routes and placement times, among other factors.

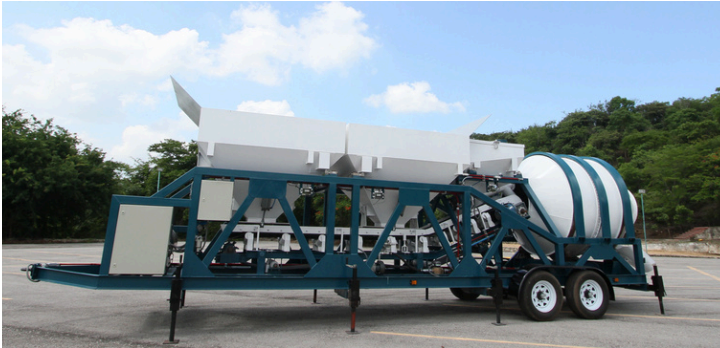

Production capacity: 2 to 3 minutes per 1 m<sup>3</sup>.

Mix type	<b>Wet</b>
Power supply	<b>Electric 220V/440V</b>
Number of aggregate scales	<b>2 a 3</b>
Modular	<b>Yes</b>
Aggregate storage	<b>Optional</b>
Cement storage	<b>Optional</b>
Control system	<b>Manual / Automated</b>

## THE BEST SOLUTION IN THE MANUFACTURE OF CONCRETE BATCH PLANTS

Its components are cutting-edge and feature a design that promotes operation with all industrial safety measures and standards. Additionally, its design is intended to minimize on-site space and eliminate the need for mixer trucks.

Whether for self-consumption projects, expanding your business units, or producing prefabricated concrete elements, Pragmacero B15 is an excellent ally with high engineering and very competitive cost. ®

Pragmacero has a presence in strategic areas, allowing us to offer personalized attention and excellent technical support, giving our clients the opportunity for accelerated growth.

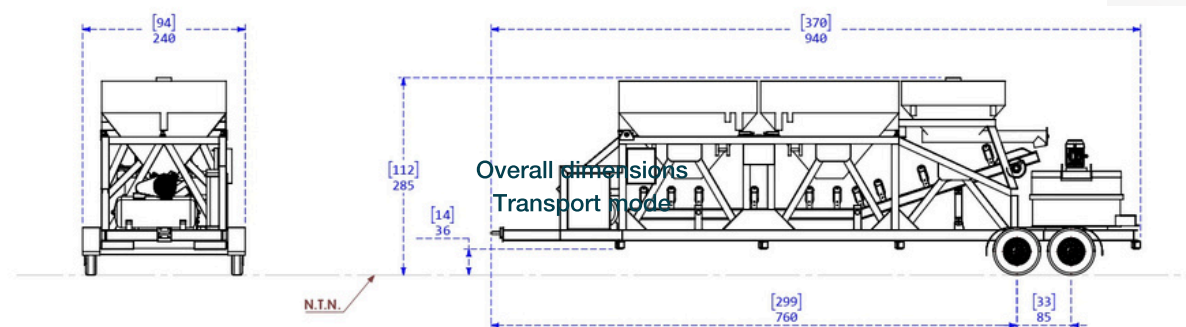

Our cost-benefit balance allows you to create a highly competitive and financially viable business model, promoting a culture of quality, productivity, and efficiency in the cement and concrete industry.
